extensions guide

doesn't every  
girl want a few  
more inches?

**BEFORE**

## **BONDED EXTENSIONS**

### **GREAT LENGTHS**

**Cold Fusion** - Gentle and desirable

A single strand application system, Cold Fusion produces small flat and cylinder bonds so hair will look and feel totally natural. Using ultrasound technology, Cold Fusion uses virtually no heat and produces the same amazing results whilst offering further protection to those with finer, heat sensitive hair. The hair comes in 55 different colours to ensure the perfect match.

### **CINDERELLA**

#### **Pre-bonded hair system**

This pre bonded hair system reduces shredding and is cuticle correct to avoid tangling. A protein moulded bond, this will not harm the natural hair, and is quick and easy to apply. The hair comes in 51 different colours to ensure the perfect match.

## **WEAVED EXTENSIONS**

Popular with celebrities the cornrowed technique allows human weft hair to be applied without glues. The clients hair is cornrowed/braided in thin sections close to the scalp that complement the hairs natural growth. These braids act as a support for the weaved in wefts of hair. The weft hair is then sewn to the braided natural hair creating a strong hold which will last a approx of 3 months.

This service is quick to apply hence being more cost effective whilst giving a perfect natural effect for single toned hair.
